Настройка камеры Webcam Bluesky Bw 400 Streaming Distribution 'Streaming' refers to distribution of digital media by means of the Internet rather than the traditional methods of record distribution to physical media such as compact discs. Webcam Drivers Windows 7 much of this is done via peer-to-peer (P2P) sharing of large files over the Internet, with the user receiving the content directly over the Internet rather than through a central server. There are two main types of streaming: real-time streaming and on-demand streaming. At any given time, there are 'on-demand' streaming services providing content to suit a range of users' tastes. These have been rapidly growing as streaming media becomes more mainstream and is used as part of a larger number of services, most commonly entertainment services such as television, music and video-on-demand (VOD). Additionally, the web has made access to various websites containing streaming media content easier for users to find (see Web media). Wikipedia may be consulted for further details on its usage. Other similar devices such as IP camcorders and webcam-equipped smartphones allow users to capture and share images and videos using their web browsers.
